

# Introduction to the **sss** package for reading and parsing sss files.

Andrie de Vries

June 20, 2012

**sss** is a package that makes it easy to read and parse survey data in the sss file format.

## 1 Example

Set path to point to import files.

```
> library(sss)
> filenameSSS <- "sample.sss"
> filenameASC <- "sample.asc"
```

Import and parse the files

```
> sssXML <- readSSSMetadata(filenameSSS)
> sss <- parseSSSMetadata(sssXML)
> asc <- readSSSdata(filenameASC)
```

Display the results.

```
> df <- read.sss(filenameSSS, filenameASC)
> print(str(df))
```

```
'data.frame':      3 obs. of  17 variables:
 $ Q1   : chr   "Visited before within the year" "Visited before that" "Visited before within the
 $ Q2_1: num    1 0 1
 $ Q2_2: num    0 1 0
 $ Q2_3: num    1 0 0
 $ Q2_4: num    0 0 1
 $ Q2_5: num    0 0 0
 $ Q2_6: num    0 0 0
 $ Q2_7: num    0 0 0
 $ Q2_8: num    0 0 0
```

```

$ Q2_9: num 1 0 1
$ Q3 : chr "Amusement Park" " " " "\Marco's\" Re
$ Q4_1: chr "Sherwood Forest" "Nottingham Castle" "Other"
$ Q4_2: chr "Other" NA "\"Maid Marion\" Cafe"
$ Q5 : num 12 999 58
$ Q6 : logi TRUE TRUE FALSE
$ Q7 : chr "Within 3 months" "More than 1 years time" NA
$ Q99 : num 1.4 0.9 0.7
- attr(*, "variable.labels")= chr "Number of visits" "Attractions visited" "Attractions visit
NULL

> print(df$Q1)

[1] "Visited before within the year" "Visited before that"
[3] "Visited before within the year"

```

## 2 Final thoughts

The last word.
